Global Reinsurance Market Data

Helping reinsurers understand their current market position and find opportunities for profitable growth.

How much more could you grow your business if you had all the data you needed, when you needed it?

In today's highly complex reinsurance landscape, getting a clear picture of global markets can seem like an impossible task.

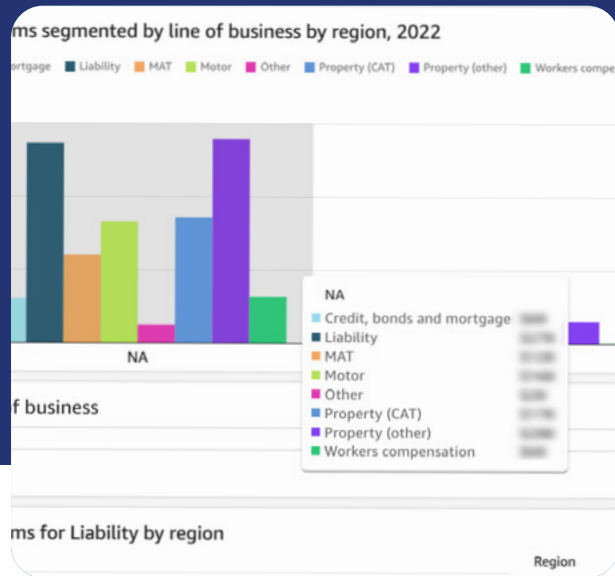

With factors such as intra-group reinsurance and cessions to reinsurance pools complicating any assessment of the data, getting valuable insights from already limited reinsurance regulatory data can result in wasted time, resources, and missed business opportunities.

We developed the Global Reinsurance Market Data tool to help you answer key questions about reinsurance markets around the world:

- What is the size of the open market?
- Which lines of business are growing fastest?
- What are the loss rates?
- What are the cession rates?
- How does the open market split between treaty and facultative reinsurance?

Bringing together data from regulators, data providers, reinsurance companies and Aon specialists, the Global Reinsurance Market Data tool provides reinsurers with estimates for their global and regional market size by product line.

The Global Reinsurance Market Data tool is designed to help you answer the most important questions for your business.

Know Your Market

Zoom in on key markets

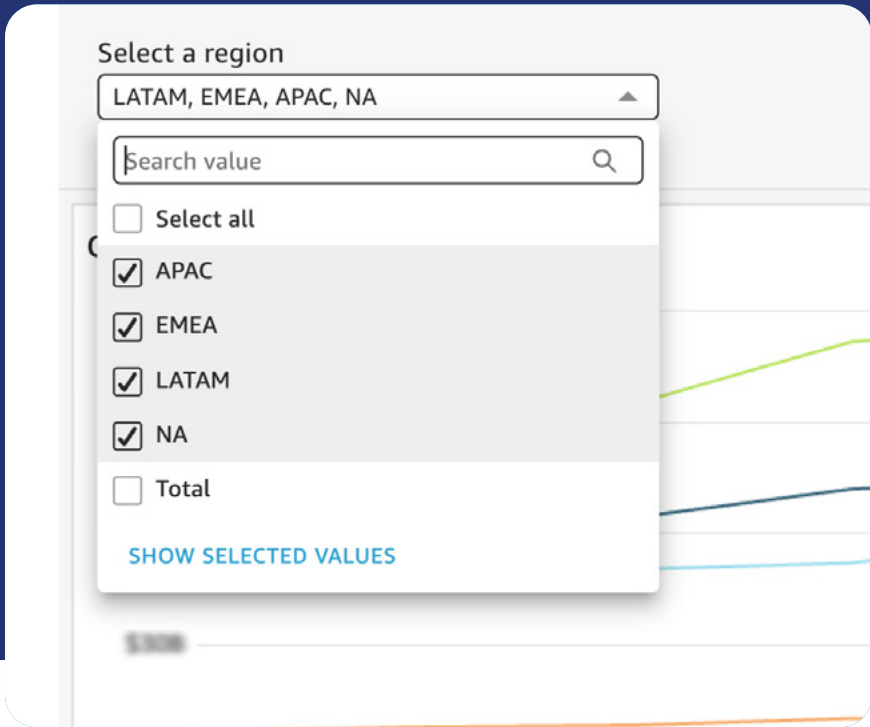

Our visualization tool lets you focus on the markets you are most interested in.

Streamlined Dashboard

Easy to use charts

Our user-friendly interface presents your results in clear, straightforward charts.

Pinpoint Your Data
